

Installation Instructions

Bench Top Filter Kit

Please Read Before Installation.

Bench Top Filter Kit Contents:

- 1x Carbon Filter
- 1x Filter Housing
- 1x Diverter Valve
- 2x Adaptors
 - 1 Standard Adaptor
 - 1 with a Rubber Attachment
- 1x Easy-Fill Cap

Choosing the Correct Solution For Your Tap:

Option 1

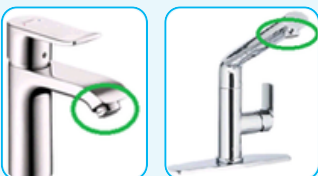

Tap Adaptor - Standard

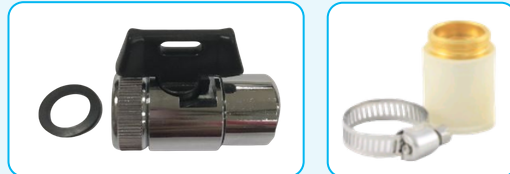

Use this when:

- Your tap has a thread on the inside (female thread) of the spout
- Common in kitchen or laundry taps with removable aerators
- The size 15/16" (27 threads per inch) is a standard style.

Example taps:

Option 2

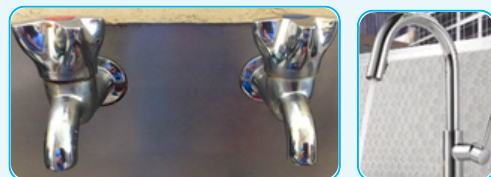

Tap Adaptor - Rubber

Use this when:

- Your tap has no thread at all
- The spout is smooth, round, or oddly shaped
- Often found on older taps, utility sinks, or outdoor taps

Example taps:

Installation Instructions Bench Top Filter Kit

Step 1

Remove the filter from its wrapping and run cold water through the centre of the cartridge to remove any excess carbon.

Step 2

Open the filter housing by unscrewing the top and place the cartridge inside. Refit the lid and tighten.

Step 3

Remove the aerator from your faucet (small, screw on mesh attachment at the tip of the faucet).

Option 1

Step 4a Tap Adaptor - Standard

Tighten the adaptor by screwing it by hand in place of where the aerator was.

Step 4b Tap Adaptor - Rubber

1: Fit the Rubber Adaptor over the neck of your tap.
2: Attach the Rubber Diverter to the Adaptor.
Tighten the metal ring using the screw to secure the Rubber Adaptor.

Step 5

Attach the filter hose to the Diverter on your tap. Turn on the water slowly. The water will flow through the filter and out the spout in ~1 minute. Let it run for ~3 minutes.

Step 6

Remove the blue cap on your Just Water bottle by lifting and peeling the cap off. Fill your bottle with filtered water via the new bench-top filter set up.

Step 7

Attach the Easy-Fill Cap to the bottle, then place it on the cooler.

Note: do not remove the white plastic inner tab.
